Parker McClelland

Professional Summary

Results-driven professional with 6+ years of experience in full-stack web development, analytics, cloud platforms, and SEO. Known for enhancing website performance, driving user engagement, and delivering actionable insights that support business goals. Explore my work at parkermc.com. Open to relocation and remote opportunities.

Professional Experience

Full Stack Web Developer
SP+ (a Metropolis Technologies company) - Remote | 11/2021 - 11/2024

- Developed 20+ scalable WordPress sites using HTML, CSS, JavaScript, jQuery, PHP, and MySQL.
- Streamlined backend and plugins to improve server response times.
- Revamped custom PHP plugins to enhance functionality and user experience.
- Conducted SEO audits and backlink analysis with Ahrefs to grow organic traffic.
- Implemented a proprietary e-commerce API plugin with parking location-based checkout.
- Built ReactJS components integrated via REST API with WordPress to create interactive user interfaces.
- Integrated Google Maps API for interactive parking location features.
- Deployed production websites on AWS with secure SFTP hosting setups.
- Managed AWS infrastructure (Lightsail, S3, SES, IAM, Route 53) for uptime and security.
- Configured and maintained MySQL databases for custom features and data access.
- Set up Google Tag Manager and Analytics to capture behavioral insights.

Technical Implementation Analyst
Juvare - Arlington, VA | 09/2019 - 09/2021

- Built custom WebEOC dashboards with HTML, JavaScript, jQuery, XML, and SQL to streamline emergency response for government clients.
- Reviewed and debugged peer code in Visual Studio to ensure quality and usability.
- Converted client requirements into scalable technical solutions, minimizing miscommunication.
- Collaborated with cross-functional teams to deliver government-compliant web solutions.

Freelance Web Developer
Self Employed - Remote | 10/2018 - Current

- Designed and developed custom WordPress websites with tailored plugins, SEO, and responsive layouts.
- Migrated legacy websites to modern WordPress frameworks, improving performance, maintainability, and mobile usability.
- Completed a WordPress Developer Internship (2018), developing a WooCommerce website with an improved user interface and user experience.

Projects

Web Developer (Capstone)
Social Destinations | 08/2017 - 05/2018

- Built a mobile-friendly social travel web app with posts and engagement features using HTML, CSS, SCSS, PHP, JavaScript, jQuery, JSON, AJAX, and SQL.
- Led a team through the full web development process, completed in May 2018.
- Redesigned and optimized the platform post-launch to enhance functionality and user experience.
- Created wireframes and mockups in InVision to guide frontend development.
- Secured the site with Cloudflare, ensuring encrypted access and user trust.
- Implemented a PHP mailer system with SMTP authentication for account verification and password resets.
- Utilized Google Maps and OpenWeather APIs for interactive maps and real-time weather data.
- Tracked SEO and user behavior via Google Analytics, Search Console, and Tag Manager.
- Developed Tableau dashboards to visualize travel trends and support actionable insights.

Education

B.S. in Informatics, Cognate in Business | Indiana University Bloomington | 08/2014 - 05/2018

Societies: Informatics and Computing Student Association, IU Student Foundation
Study Abroad: IT in Emerging Markets - India (09/2016 - 01/2017)

Certifications

Microsoft Excel for the Data Analyst X Series - edX | 03/2018

- Analyzed and visualized multi-source data using Excel tables, pivot tables, statistical functions, and Power BI with DAX to create insightful dashboards and reports.
